Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 21-25, 28, 35-39, 42 and 51 rejected under 35 U.S.C. 102(e) as being anticipated by Patel et al. (5,566,278).

With regard to claim 21, Patel et al teaches a printer(222) comprising: a communication interface (e.g. fig. 7, item labeled channel) , an image forming device (528); and a processor (e.g. claim 4), connected to the communication interface and the image forming device (e.g. see figs. 5-7) configured to report a printer status using an object oriented command, wherein the printer status includes printer configuration (e.g. figs. 5-7, col. 11, lines 5-60, and col. 10, lines 50-64).

With regard to claim 22, Patel et al teaches and inherently teaches using JAVA reads on col. 5, lines 7-25, the ability to use an object oriented language).

With regard to claims 23-24, Patel et al 1 teaches the processor is configured to control the printer using a complex graphics operator (e.g. col. 6, lines 56-67).

With regard to claim 25, Patel et al. the processor is configured to control the printer using a graphical operator which is a subclass of an exiting graphics primitive (e.g. col. 6, lines 56-67 and col. 9, lines 15-32).

With regard to claim 28, Kashiwazaki et al teaches the processor is configured to process commands in multiple languages (col. 11, lines 5-60, and col. 10, lines 50-64).

With regard to claims 35-39,42 and 51, the limitations of claims 35-39,42 and 51 are covered by the limitations of claims 21-25 and 28 above.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 26-27,29-30,35-34 and 45-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Patel et al.5,566,278 as applied to claims 21 and/or 35 above.

With regard to claims 26-27,29-30,36-34 and 45-50, Patel et al. teaches the use of a JAVA language within a printer (see details above), the features of claims 26-27 and 29-30 represent the feature of the JAVA language (see page 2 of Applicant's disclosure). Therefore, it would have been obvious to one of ordinary skill to provide the system taught by Patel et al. with the feature(s) of the JAVA printer, since these-feature are inherently-part- of the JAVA printer that will be incorporated to any system when the

JAVA language is used.

With regard to claims 40-41 and 43-44 , the limitations of claims 40-41 and 43-44 are covered by the limitations of claims 26-27 and 29-30 above.

Conclusion

3. Applicant's arguments with respect to claims 21-51 have been considered but are moot in view of the new ground(s) of rejection.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gabriel I. Garcia whose telephone number is (571) 272-7434.
